THIS supplement to the University Catalogue of Boston College has been prepared for the guidance of prospective students. It is condensed in form, but contains all the essential facts concerning admission requirements, courses, etc.

It is clear that institutions of higher learning are faced with the problem, difficult of solution, of training young men for a manful part in the great national effort for the world after victory. The future of our own nation as well as the future of youth calls for courses of instruction that will contribute to the well-being of both in this post-war period.

Boston College is keenly alive to the problems facing higher education today and will make every effort to equip her students for their place in a world at peace.

RELIGIOUS TRAINING

While Boston College is a Catholic College, in the admission of students no discrimination is made on the grounds of religious belief. Religious instruction is given in class periods* which forms an integral element of the curriculum. The formal instruction is supported by various spiritual extra-curricular activities and practices. A Student Counsellor is available at all times to the student. Finally, there is an all pervading background against which all the individual elements, which must be the staple of sound education for the immediate future in the post-war world, are projected. Religion plays no small part in the formation of loyal citizens and will always be a factor in the lives of individuals as well as of our nation.

ENTRANCE REQUIREMENTS

GENERAL STATEMENT

Entrance requirements are administered by the Committee on Admissions. Applications for admission to Boston College must be filed with the Registrar at least six weeks before the date of Entrance Examinations. After each application has been examined by the Committee on Admissions, the candidate will be notified as to his eligibility for admission to the Entrance Examinations. Examinations will be conducted according to schedule on the last page of this bulletin.

* Non-Catholic students are free to attend this instruction.

SCHOLARSHIP EXAMINATIONS

Each year Boston College awards a number of full and partial scholarships. These awards are made on the results of competitive examinations which are the same as the entrance examinations.

In order to qualify for the Scholarship Examinations, certification in the four secondary school subjects in which the candidates will be examined is required. The subjects of the examinations are determined by the course elected. Consult page 4.

Scholarship Examinations will be held, according to the schedule on the last page of this bulletin.

COURSES AND REQUIREMENTS FOR DEGREE*

GENERAL

It is axiomatic of Jesuit Education that genuine education demands the supervision and control of trained and experienced teachers and is not something to be regulated by inexperienced students. To-day, more than ever before, in the midst of bewilderment and vagueness, supervised courses of instruction for the needs of today as well as for tomorrow, are imperative. Therefore, a harmonious sequence of courses must be arranged, with courses in Language, History, Mathematics, the Natural Sciences and Philosophy forming the core of a prescribed curriculum.

Together with these courses more specialized fields are integrated and intensive training in the Languages and Literature or Mathematics and the Natural Sciences or in the Social Sciences is not only possible, but is desirable.

The College of Arts and Sciences at the present time confers two academic degrees, Bachelor of Arts (A.B.), and Bachelor of Science (B.S.). Individual courses of study, which will be found on subsequent pages, are consequently arranged in two groups, each one leading to one of these two degrees. Within the Bachelor of Science group, there are again seven groups, since all students registering for this degree are expected to concentrate in one of the following fields: Biology, Chemistry, Physics, Mathematics, History, Education, Social Sciences.**

Registrants for the degrees of Bachelor of Arts and Bachelor of Science in the various sciences must present a **secondary** school diploma and written evidence that fifteen (15) units of work have been completed in an accredited secondary school; these units must be approved by the Committee on Admissions. The distribution of these units must be as follows:

BACHELOR OF ARTS

Plane Geometry	1	Latin	3
English	4	Elementary Algebra	1
Other units 6			

Bachelor of Science in Biology, Chemistry, Physics and Mathematics

Plane Geometry	1	Science	1
English	4	Algebra	1½
Other units 7½			

*No accelerated courses are offered at Boston College.

**For information on College of Business Administration consult page 17.

Bachelor of Science in History, Education and Social Science

Plane Geometry	1	U. S. History or	
English	4	U. S. History and	1
Elementary Algebra	1	Civil Government	
Other units 8			

All applicants for admission to Boston College, in addition to fulfilling the general unit requirements must receive satisfactory grades in the Boston College Entrance Examinations. These examinations consist of a series of objective tests designed to measure aptitude and achievement.

REQUIRED EXAMINATIONS

Candidates applying for the Bachelor of Arts course:

Elementary Algebra	Latin
Plane Geometry	English

APTITUDE TEST

Candidates applying for the Bachelor of Science courses with majors in Biology, Chemistry, Physics and Mathematics:

Intermediate Algebra
Plane Geometry
One science (Biology or Physics or Chemistry)
English

APTITUDE TEST

Candidates applying for the Bachelor of Science courses with majors in Education, History and Social Science:

Elementary Algebra	United States History
Plane Geometry	English

APTITUDE TEST

HONORS WORK

The course leading to the degree of Bachelor of Arts with Honors is reserved to the more gifted students, whose secondary school work and entrance examination results indicate that they have the ability to carry a program of intensive academic work. To remain in the Honors Course, students must maintain an average of at least "B" in all major subjects of study.

More intensive classroom work and assignments for personal investigation outside of class than is ordinarily expected will be exacted of Honors Course students.

Students registered in the A. B. Honors course follow the Bachelor of Arts with Greek curriculum.

At the discretion of the Dean of the College, students in Honors may be exempted from regular attendance at classes, but written reports, personal conference with Instructors, group discussions will be required.

VOCATIONAL GUIDANCE AND PLACEMENT

Boston College offers special assistance to students in choosing courses that will best qualify them for their place in the world. The Office of Guidance and Placement helps them in obtaining information concerning vital services that may be rendered in industry as well as educational and professional opportunities.

Assistance is also offered in solving the problem of employment during the collegiate career of the student.

EDUCATIONAL GUIDANCE

Boston College, realizing that individual adjustment to college life and work is for most students a difficult task, offers educational assistance and direction to her students both in the selection of the courses most valuable to them and in the

mastery of the courses selected. In doing this it maintains an educational guidance office with a director of guidance in charge who acts as chairman for a group of professors assigned to this work. The central office by means of interviews, tests and a study of the high school records endeavors to obtain knowledge of the interests, the scholastic background and the general and specific abilities of each student. A specific testing service is maintained for this purpose. The findings of this office are in turn handed over to the committee in charge of guidance. Each professor of this committee is allotted a definite group of students who are required to visit him at definite times during the school year with the understanding that the students may go to him freely at other times. Each counsellor is supplied with data on the students' interests, aptitudes, present achievement and personality traits. Equipped with this information the counsellor is able to aid the student in pursuing his college course more successfully. In addition, instruction in how to study, use the library, and do research work are given individually and by means of printed material and lectures.

STUDENT ORGANIZATIONS

Boston College offers a varied program of extra-curricular activities, Religious, Academic, Dramatic, Forensic, Athletic. These organizations, suited to the choice and interest of the individual, supplement the work of the classroom and give ample opportunity for self-expression, initiative and poise.

Religious activities are in no way minimized, for in the formation of the whole man, in the development of a fruitful and purposive life, religion has no substitute.

Dramatic and forensic activities are used to channel to local communities and clubs correct notions of democracy, freedom, the historic role that America is playing in the present day post war aims and adjustment.

Competitive sports serve to sharpen the competitive instincts of the student and newer lessons of loyalty, cooperation and team-play are their goal.

DORMITORY ACCOMMODATIONS

There are limited dormitory accommodations at Boston College. Address inquiries concerning residence in dormitories to:

REV. EDWARD J. SULLIVAN, S.J.
Dean of Men
BOSTON COLLEGE
UNIVERSITY HEIGHTS

SUMMARY OF ANNUAL EXPENSE REQUIREMENTS

General Fees	Acceptance Deposit (not refundable)	\$ 25.00
	Registration—upper classes (not refundable)	1.00
	Registration—new students (not refundable)	5.00
	Late Registration—additional	5.00
	Tuition—payable quarterly in advance	350.00
	*Student Activities—payable per semester with tuition	40.00
	Library—payable per semester with tuition	15.00
Special Fees	Absentee Test	5.00
	Condition and Absentee Examination	5.00
	Deficiency Course	25.00
	Change of Course	10.00
	Change of Individual Subject	5.00
	Inorganic Chemistry—payable per semester	20.00
	Organic Chemistry—payable per semester	40.00
	Physical Chemistry—payable per semester	30.00
	Qualitative Analysis	15.00
	Quantitative Analysis—payable per semester	30.00
	Qualitative Organic Analysis	20.00
	Biochemistry	20.00
	Physics—payable per semester	20.00
	**Biology—payable per semester	30.00
	Mammalian Anatomy	20.00
	Graduation	10.00

* The student Activities Fee subsidizes expenses incidental to the conduct of extra-curricular activities and entitles the student to subscription for the *STYLUS* and *HEIGHTS*, to student publications; to athletic reductions.

This fee applies to all Biology Courses other than **Mam-malian Anatomy.

Each student taking one or more Chemistry courses must keep a \$15.00 breakage deposit at the Treasurer's Office. Damage to equipment or waste of chemicals by any student will be charged against his deposit. The laboratory fee covers rentals of locker and apparatus, use of gas, water, electricity, chemicals and equipment, and the many incidental expenses of conducting a laboratory course.

Holders of scholarships are not exempt from the payment of Registration, Student Activities, Library or Science Fees at the time prescribed.

RESERVE OFFICERS TRAINING CORPS, U.S.A.

An ROTC Unit, Artillery Branch, has been established at Boston College. The course of instruction in Military Science is designed to produce junior officers with required qualities of leadership. Upon successful completion of this course in conjunction with the requirements for the academic degree, the candidate is commissioned as a Reserve Officer of the Army of the United States. Before being eligible as a candidate for the ROTC Unit, all entrance requirements for admission to Boston College must have been fulfilled by the applicant.

CURRICULUM — MILITARY SCIENCE

FRESHMAN YEAR

Subjects	Hours
a. World Military Situation.....	8
b. Military Organization	8
c. Hygiene and First Aid	10
d. Leadership, Drill and Exercise of Command.....	36

FOREWORD

THIS supplement to the Catalogue of the College of Business Administration of Boston College has been prepared for the guidance of prospective students. It is condensed in form, but contains all the essential facts concerning admission requirements, courses, etc.

It is clear that institutions of higher learning are faced with the problem, difficult of solution, of training young men for a manful part in the great national effort for the world after victory. The future of our own nation as well as the future of youth calls for courses of instruction that will contribute to the well-being of both in this post-war period.

Boston College is keenly alive to the problems facing higher education today and will make every effort to equip her students for their place in a world at peace.

RELIGIOUS TRAINING

While Boston College is a Catholic College, in the admission of students no discrimination is made on the grounds of religious belief. Religious instruction is given in class periods* which forms an integral element of the curriculum. The formal instruction is supported by various spiritual extra-curricular activities and practices. A Student Counsellor is available at all times to the student. Finally, there is an all pervading background against which all the individual elements, which must be the staple of sound education for the immediate future in the post-war world, are projected. Religion plays no small part in the formation of loyal citizens and will always be a factor in the lives of individuals as well as of our nation.

ENTRANCE REQUIREMENTS

GENERAL STATEMENT

Entrance requirements are administered by the Committee on Admissions. Applications for admission on the form supplied by Boston College should be filed with the Registrar at least six weeks before the date of Entrance Examinations. After each application has been examined by the Committee on Admissions, the candidate will be notified as to his eligibility for admission to the Entrance Examinations. Examinations will be conducted on April 9, 1949.

* Non-Catholic students are free to attend this instruction.

SCHOLARSHIP EXAMINATIONS

Each year Boston College awards a number of full and partial scholarships. These awards are made on the results of competitive examinations which are the same as the entrance examinations.

In order to qualify for the Scholarship Examinations, certification in the four secondary school subjects in which the candidates will be examined is required. The subjects of the examinations are determined by the course elected. Consult page 4.

Scholarship Examinations will be held on April 9, 1949.

COURSES AND REQUIREMENTS FOR DEGREE*

GENERAL

It is axiomatic of Jesuit Education that genuine education demands the supervision and control of trained and experienced teachers and is not something to be regulated by inexperienced students. To-day, more than ever before, in the midst of bewilderment and vagueness, supervised courses of instruction for the needs of today as well as for tomorrow, are imperative. Therefore, a harmonious sequence of courses must be arranged, with courses in Language, History, Mathematics, the Natural Sciences, Philosophy and Theology forming the core of a prescribed curriculum.

The College of Business Administration at the present time confers the academic degree of Bachelor of Science in Business Administration (B.S.B.A.). Individual courses of study, which will be found on subsequent pages, are consequently arranged in four groups, each one leading to the degree. These fields of concentration are Accounting, Marketing, Management and Finance. The entire sequence of studies in each of these fields will be found in the following pages.

Registrants for the degree of Bachelor of Science in Business Administration must present a secondary school diploma and written evidence that fifteen (15) units of college-preparatory work have been completed in an accredited secondary school; these units must be approved by the Committee on Admissions. The distribution of these units must be as follows:

English	4	Plane Geometry	1
Elementary Algebra	1	United States History	1
8 other Academic Units			

All applicants for admission to Boston College, in addition to fulfilling the general unit requirements, must receive satisfactory grades in the Boston College Entrance Examinations. These examinations consist of a series of tests designed to measure aptitude and achievement.

REQUIRED EXAMINATIONS

Elementary Algebra	English
Plane Geometry	United States History
General Aptitude Test	

VOCATIONAL GUIDANCE AND PLACEMENT

Boston College offers special assistance to students in choosing courses that will best qualify them for their place in the world. The Office of Guidance and Placement helps them in obtaining information concerning vital services that may be rendered in industry as well as educational and professional opportunities.

Assistance is also offered in solving the problem of employment during the collegiate career of the student.

EDUCATIONAL GUIDANCE

Boston College, realizing that individual adjustment to college life and work is for most students a difficult task, offers educational assistance and direction to her students both in the selection of the courses most valuable to them and in the mastery of the courses selected. In doing this it maintains an Educational Guidance Office with a Director of Guidance in charge who acts as chairman for a group of professors assigned to this work. The central office by means of interviews, tests and a study of the high school records endeavors to obtain knowledge of the interests, the

scholastic background and the general and specific abilities of each student. A specific testing service is maintained for this purpose. The findings of this office are in turn handed over to the committee in charge of guidance. Each professor of this committee is allotted a definite group of students who are required to visit him at definite times during the school year with the understanding that the students may go to him freely at other times. Each counselor is supplied with data on the students' interests, aptitudes, present achievement and personality traits. Equipped with this information the counsellor is able to aid the student in pursuing his college course more successfully. In addition, instruction in how to study, use the library, and do research work are given individually and by means of printed material and lectures.

STUDENT ORGANIZATIONS

Boston College offers a varied program of extra-curricular activities, Religious, Academic, Dramatic, Forensic, Business and Athletic. These organizations, suited to the choice and interest of the individual, supplement the work of the classroom and give ample opportunity for self-expression, initiative and poise.

Religious activities are in no way minimized, for in the formation of the whole man, in the development of a fruitful and purposive life, religion has no substitute.

Dramatic and forensic activities are used to channel to local communities and clubs correct notions of democracy, freedom, the historic role that America is playing in present day aims and adjustment.

Several Business Clubs furnish added opportunities to develop further in the field of concentration selected by the individual student.

Competitive sports serve to sharpen the competitive instincts of the student and newer lessons of loyalty, cooperation and team-play are their goal.

DORMITORY ACCOMMODATIONS

There are limited dormitory accommodations at Boston College.
Address inquiries concerning residence in dormitories to:

RESERVE OFFICERS TRAINING CORPS, U.S.A.

An ROTC Unit, Artillery Branch, has been established at Boston College. The course of instruction in Military Science is designed to produce junior officers with required qualities of leadership. Upon successful completion of this course in conjunction with the requirements for the academic degree, the candidate is commissioned as a Reserve Officer of the Army of the United States. Before being eligible as a candidate for the ROTC Unit, all entrance requirements for admission to the College of Business Administration must have been fulfilled by the applicant.
